

## Universal Beam Clamp

For side load applications where conventional Beam Clamps are unsuitable

The Universal Beam Clamp has been designed for both vertical & side load applications, for situations where conventional clamps aren't suitable. This versatile clamp can be used for lifting, pulling or as an anchor point.

It can be loaded at any angle, eliminating the use of spreader beams in multiple lifting situations.

Designed with a low headroom anchor point, it can be used as a single or twin lifting point, lightweight and easy to use, allowing for ease of use.

**WARNING:** Do not exceed working load limits or use this equipment for lifting flat plate sections (not to be used as a plate lifting clamp)

Model	WLL	Beam Width	Dimensions										Weight
			A	B	C	D	E	G	H	J	K	L	
UBC3	3048kg	125-204	387	N/A	70	48	32	100	25.4	28	20	N/A	13.5kg
UBC5	5080kg	125-305	524	10	75	48	32	120	25.4	38	25	10	28.5kg
